Profile

I have 1+ year of hands-on experience in MERN stack development, with a strong focus on building responsive and scalable frontend applications using React.js. During my internship and individual projects, I developed reusable UI components, integrated REST APIs, and maintained clean, structured codebases. I also have working knowledge of TypeScript and I am currently expanding my frontend expertise by learning Next.js and exploring Artificial Intelligence technologies to build modern, performance-optimized smart web applications. My experience has helped me develop strong problem-solving skills and a solid understanding of modern frontend architecture, with a growing interest in AI-driven solutions.

Education

BICT (Hons) with a Specialization in Software Systems <i>University of Kelaniya, Sri Lanka - GPA - 3.54</i>	March 2021 - November 2025
G.C.E. Advanced Level <i>J/ Puttur Sri Somaskanda College - Z-Score - 1.4852</i>	2017 - 2019

Professional Experience

Full-Stack Developer - Intern <i>QTechy</i>	August 2024 - February 2025 <i>Remote</i>
---	--

Worked on real-world projects including E-commerce systems, E-Card applications, and rental management platforms.

- Developed and maintained web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented frontend features in React.js by converting UI/UX designs into responsive and user-friendly interfaces.
- Built and integrated REST APIs and handled basic backend logic using Node.js and Express.js.
- Participated in daily stand-up meetings for task assignment and progress updates, and attended review meetings to receive feedback and improve features.
- Fixed bugs, performed basic debugging, and optimized application performance to improve usability and reliability.
- Collaborated with team members using GitLab and followed standard development workflows.

Data Management Associate <i>Port City BPO (Pvt) Ltd.</i>	January 2026 - April 2026 <i>On-site</i>
---	---

Handled operational data processes and maintained transaction records in a fast-paced work environment.

- Managed and updated daily data records with accuracy and confidentiality using Microsoft Excel and internal management systems.
- Processed transactions and verified data entries to ensure consistency and error-free records.
- Prepared reports, spreadsheets, and maintained organized documentation for internal use.
- Worked with team members to resolve data-related issues efficiently and meet daily targets.
- Maintained attention to detail while handling high-volume tasks under deadlines.
- Utilized tools such as Microsoft Excel, Google Sheets, email platforms, and office productivity software.

Project

Driver Mood Sync Music System

Final year individual project

- Developed an AI-powered in-car music system using TensorFlow and React.js to detect driver emotions (happy, sad, angry, neutral, drowsy) via facial expressions and contextual data.
- Generated real-time mood-based playlists, enhancing driver comfort, engagement, and road safety.
- Integrated machine learning models with a responsive web interface, showcasing skills in AI, frontend-backend integration, and real-time data processing.
- Technology Stack - TensorFlow, React.js, JavaScript, OpenCV (for facial emotion detection), Python, HTML5, CSS3.
- GitHub: [Mood-based-playlist-generator](#) | YouTube: [Mood sync music system](#)

Learning Management System (LMS)

Academic Individual Project

- Developed a full-stack Learning Management System with multi-role authentication (Admin, Instructor, Student).
- Implemented course management, student enrollment, assignments, and results tracking features.
- Built responsive UI and integrated REST APIs for scalable learning workflows.
- Technology Stack - Node.js, Express.js, React, MongoDB, Tailwind CSS.
- GitHub: [Learning-Management-System](#)

CineMate – Movie Information Web Application

Self Learning Project

- Developed an individual project with React.js and Tailwind CSS, creating a responsive and visually appealing interface.
- Integrated external movie APIs to fetch and display movie titles, summaries, ratings, and release details.
- Implemented an efficient search and filter system, improving user experience and engagement.
- Technology Stack - React.js, Tailwind CSS, JavaScript, Axios (for API calls), HTML5, CSS3.
- GitHub: [movie-mind](#)

Certifications

- Completed a short course on CSS, Bootstrap, JavaScript, and PHP Stack Complete Course (Udemy, 2024) - [Certificate](#)
- Completed a short course on WordPress for Beginners – Master (Udemy, 2024) - [Certificate](#)

Tools & Skills

- Programming Language: JavaScript, PHP
- Frameworks and Libraries: React.js, Redux, HTML, Tailwind
- Runtime Environment: Node.js
- Database: MongoDB, MySQL
- Version Control: Git, GitHub, GitLab
- CMS & Platforms: WordPress

Soft Skills

- Problem solving
- Time management
- Team Collaboration
- Critical Thinking
- Effective Communication

Languages

- English - Professional
- Sinhala - Intermediate
- Tamil - Native
